- During the early part of May 1956, I was told by several engineers, close
 associates when I believe to be reliable, that the Ministry of Defense was
 alerted concerning the over-flight of a formation of unknown flying objects,
 flying in an easternly direction during that south.
- 2 My friends related that but appeared to be sircraft, flying in formation at an extremely high rate of speed at approximately twenty-five thousand meters, were observed by radar units of the Boad Air Defense Command. Enthing was done to disturb this flight, the probable reason being that the Boad Air Defense Command and no weapons at its disposal to reach these introduces.
- 3. During the mane period, May and June 1956, many reports originating from all sections of Europey cited the appearance of "Flying Saucers". For two or three weeks, reports appeared almost daily, Sescribing these objects as fast-flying objects which could change direction of flight, acceleration and decaleration with usmost mane. By friends told me of discussions at the War Technical Institute in which Europey's leading settness's cited, engineers and technicisms told part, concerning these objects. It was decided that they did not exist and that if anything, the reports were include by US propagants. As official annuncement appeared in "Essiad Rep" declaring the entire "figing saucer" scare was a myth.
- An interreting observation of one of my full-squar however, was "Even if they don't exist, I hope they arm on their vary to bomb Moscov."
